

Information Security Education Day (ISED)

Theme 2018: Internet of Things: security challenges and opportunities

4 May 2018 - 9:00-16:00 - Campus Belval - Maison du Savoir - Room 3.330

PRESENTATION

The Information Security Education Day (ISED) is a yearly one-day event co-organized by the University of Luxembourg (Computer Science and Communications Research Unit - CSC) and the Luxembourg Institute of Science and Technology (LIST), sponsored by the Club de la sécurité de l'information Luxembourg (CLUSIL).

ISED provides each year new knowledge on a hot-topic related to security and privacy. It is an ideal forum where academics and practitioners can learn about the different facets of a key-topic, exchange and discuss ideas, and compare experiences.

In this spirit, ISED seeks to be an interdisciplinary event, open to all. The speakers will bring their expertise in different areas covering the legal, technical and research-wise facets of the theme.
